

## SPECIFICATION AMENDMENTS

**Please amend the Specification as follows:**

Page 10, fifth paragraph:

--In an organic electroluminescence element material of this invention, an organic EL element material, which is a metal complex having a specific ligand, could be obtained by adopting a constitution defined by any one of ~~claims~~ Items 1 - 7. An organic EL element having high emission efficiency and long emission life could be obtained by utilizing said organic EL element material. Further, by utilizing the aforesaid organic electroluminescence element, the display device described in ~~claim~~ Item 11 and the illumination device described in ~~claim~~ Item 12 each, exhibit high luminance as well as high durability, could be obtained.--
